

Mac-compatible shipping tools are Intel Mac and Mac OS X Leopard ready

Harness the power of carrier-certified shipping solutions.

Milwaukee, WI – January 14, 2008 – NRG Software, LLC. announced the availability of several updated workflow solutions for implementing simplified, time-saving parcel shipping on Mac OS X and Microsoft Windows.

NRGShip **for UPS v1.2**

Making it easier for customers to utilize UPS shipping services, NRG Software has updated its flagship product, NRGship for UPS for full Intel Mac and Mac OS X Leopard compatibility. Customers using the solution can easily access critical shipping information without having to leave their database to access a web site or dedicated shipping computer to re-enter data.

NRGship user Cliff Stoll from Acme Klein Bottle states “Thanks to NRG Software’s UPS Software, I go from Invoice to completed shipping label in two clicks and 12 seconds. It tells me transit time, cost, and tracks each shipment. Even better, it works entirely within my familiar FileMaker Pro environment -- hand-in-hand with my invoices and customer database. So there's no new language to learn, no slow browsers, and no oddball interfaces. It runs reliably on my Mac and PC, without a shrug.”

With NRGship you can easily access a wide range of UPS functionality to provide a seamless workflow for shipping and tracking of parcel shipments with full support for UPS supplied thermal printers and digital scales.

NRGValidate

v1.5

Available as a stand-alone application or as a set of databases which can be easily integrated into an existing FileMaker Pro database, NRG Address Validation is designed to help companies cleanup their databases to insure proper addressing for standard and parcel mailing. Utilizing Dial-A-Zip from Endicia.com, NRG Address Validation allows for real-time address validation along with access to Delivery Point Validation™ (DPV), Residential Delivery Indicators™ (RDI), rural flags.

Built using the award-winning FileMaker Pro database engine, NRG Software solutions support Mac OS X 10.4 or higher or Windows XP and above. Visit <http://www.nrgsoftware.com/> to purchase, download demonstration copies, view sample shipping labels, and obtain pricing information along with further product details.

Founded in 1996, NRG Software, LLC. is committed to bringing cutting edge software to the marketplace. NRG is a leading developer of custom FileMaker Pro and publishing automation solutions.
