

NRG: Mac & FileMaker Shipping Software

How do I do perform a drop shipment, using an alternate address than mine on the shipping label?

For NRGship UPS

Simply select an alternate address than yours from the sender address drop down menu. You can add as many alternate addresses as you'd like. The address selected will appear as the Sender on the shipping label.

For NRGship UPS Pro and NRGship UPS for FileMaker

On the Sender tab, select an alternate address from the Drop Ship drop down menu. The options are based on addresses in your address book that have the "Drop Shipper Address" checkbox checked. The address selected will appear as the Sender on the shipping label.

For NRGship FedEx for FileMaker

On the Sender tab input an alternate address. The address you input will appear as the Sender on the shipping label.

For NRG Ship Connect

On the Sender tab (Origin tab in the Freight Portal), select an alternate address from the Alternate Address Company drop down menu. The options are based on addresses in your address book that have the "Drop Shipper Address" checkbox checked. The address selected will appear as the Sender on the shipping label. Courier Note: The alternate address (drop-ship) option is not available in the Courier portal of the NRG Ship Connect solution.
