

NRG: Mac & FileMaker Shipping Software

Does address data detection work in the Mac OS to create UPS shipping labels in NRGship? (video)

Yes, but only with NRGship UPS. NRGship UPS Pro or our FileMaker products won't support this. So if you are running Mac OS 10.6, you can utilize Snow Leopard's address data detection feature to easily create UPS shipping labels from a website, email or Mac application. The following video demonstrates:
